## Patients Visiting our Clinics

When visiting any of our clinics/in order to keep you safe we have introduced the following new measures:

- You must book an appointment in advance and fill out a travel questionnaire
- We will not accept walk-in patients, everyone needs to phone in advance and give a travel history
- We ask our patients to attend their appointments alone or with their spouse (other family member should not attend)
- Our staff will undergo a daily temperature check when reporting for work
- Our receptionists, nurses and doctors will be wearing masks in the clinic
- Hand-sanitizer and alcohol wipes are available for staff and patients
- We have increased the frequency of cleaning our facilities
